The ability to share information and files throughout your organization is essential in today's business environment. With the explosion of content creation and information in electronic formats, there is simply more electronic data today than ever before. The Internet has propelled both consumers and companies alike into a Web-enabled, information-driven era. In fact, getting real-time information in the right hands is key to maintaining a competitive advantage in businesses worldwide.

With ExeClix, your critical and sensitive information can be shared with simple point-and-click commands.

Converge^{EXE}

custom software solutions
database management
business automations

workflow consultation
systems integration

Transfer files with ease,
with the newest FTP program
from ConvergeXe!

Converge^{EXE}

ExeClix Benefits:

ExeClix offers many benefits of use, including the following:

- Excellent for time saving, cost-effective FTP setups in all industries requiring its use.
- Amazingly simplified get and send functionality within condensed view drastically improves user setup time to nil.
- The ability for advanced FTP configurations to be stored and retrieved automatically allows for nifty file automation capabilities within companies seeking this option.
- A set up user need not even interface directly with the application ever to perform advanced, encrypted files transfer to remote servers, improving multitasked efficiency.
- Truly revolutionizes File Transfer Protocols as we know it, allowing Doctors, Web Administrators, IT personnel, and practically anyone else who knows how to point and click, to send and receive highly encrypted files from remote FTP servers with little to no hesitation and confusion.

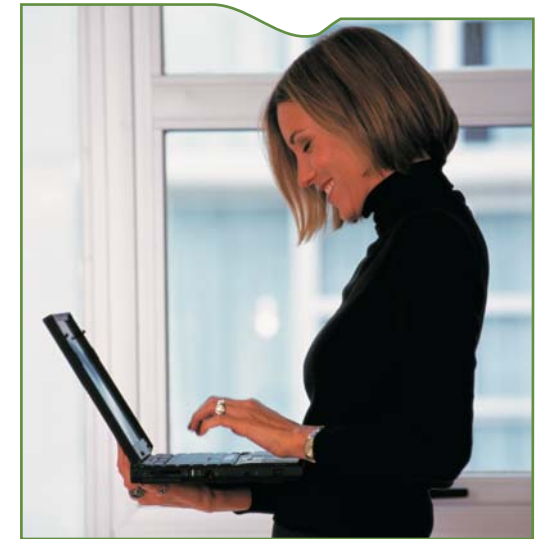

- Free configuration examples and ftp setups available for large to small firms upon request makes it easy to replicate advanced features and initial setups

ExeClix is ideal for IT Professionals, Web Administrators, and even Doctors. With it's robust, efficient two-button operation and downloadable configuration files, setting up and using ExeClix is a breeze.

ExeClix Features:

The ExeClix feature list is extensive. Here is a sample of the features available:

- Auto starts with Windows startup and can be minimized to the task tray
- Export & import encrypted file containing user name and passwords per ftp
- Can create folder directory structure from configuration file (file names and folders with subfolder structure)
- All transfers are kept in a log/history and can be cleared at any time (contains files uploaded and downloaded with full path, time and date)
- File explorer tree interface for downloading and uploading files when needed
- Ability to download subfolders with one click

- Ability to place downloaded and uploaded files to an automatically dated folder
- Ability to time and date stamp filenames upon download, appending original file name to stamp
- Ability to automatically set download folder (Master download folder), including subfolders, to be deleted automatically upon downloading new files from server.
- Ability to automatically have sent files moved to a sent folder upon successful upload
- Complete 128 bit HIPAA compliant encryption

...And many more! Visit us at www.converge.com to view a complete List of features.
